

This project has received funding from the European Union's Horizon 2020 research and innovation programme under grant agreement No 770141.

TRANS-URBAN-EU-CHINA

Transition towards urban sustainability through socially integrative cities in the EU and in China

WP 2

Bridging the Planning-Implementation Gap in Eco- and Smart Cities

Consortium Meeting
20.08.2020

Hans-Martin Neumann, Jianming Cai,
Daiva Jakutyte-Walangitang,
Susanne Meyer, Christoph Brodник,
Gudrun Haindlmeier, Lorian Paolucci

Status of WP2

Bridging the planning-implementation gap

- ✔ Both book chapters were finished and submitted to the editorial company.
- ☐ D2.3 is in process & will be submitted to EC by the end of September.
 - ☐ drafting the report is ongoing
 - ☐ analyzed tools and mechanism were sharpened since the last time
 - ☐ Result 10 categories
 - ☐ based on case studies and literature research
 - ☐ Document describe them and show concrete examples of the cities to understand them better
 - ☐ AIT work together with CAS to show European and Chinese Examples
 - ☐ Ongoing coordination with NTNU and CAS about the workshop
- ☐ D2.4 will be submitted as planned.

This project has received funding from the European Union's Horizon 2020 research and innovation programme under grant agreement No 770141.

TRANS-URBAN-EU-CHINA

Transition towards urban sustainability through socially integrative cities in the EU and in China

D 2.3 Tools and Mechanism Overview

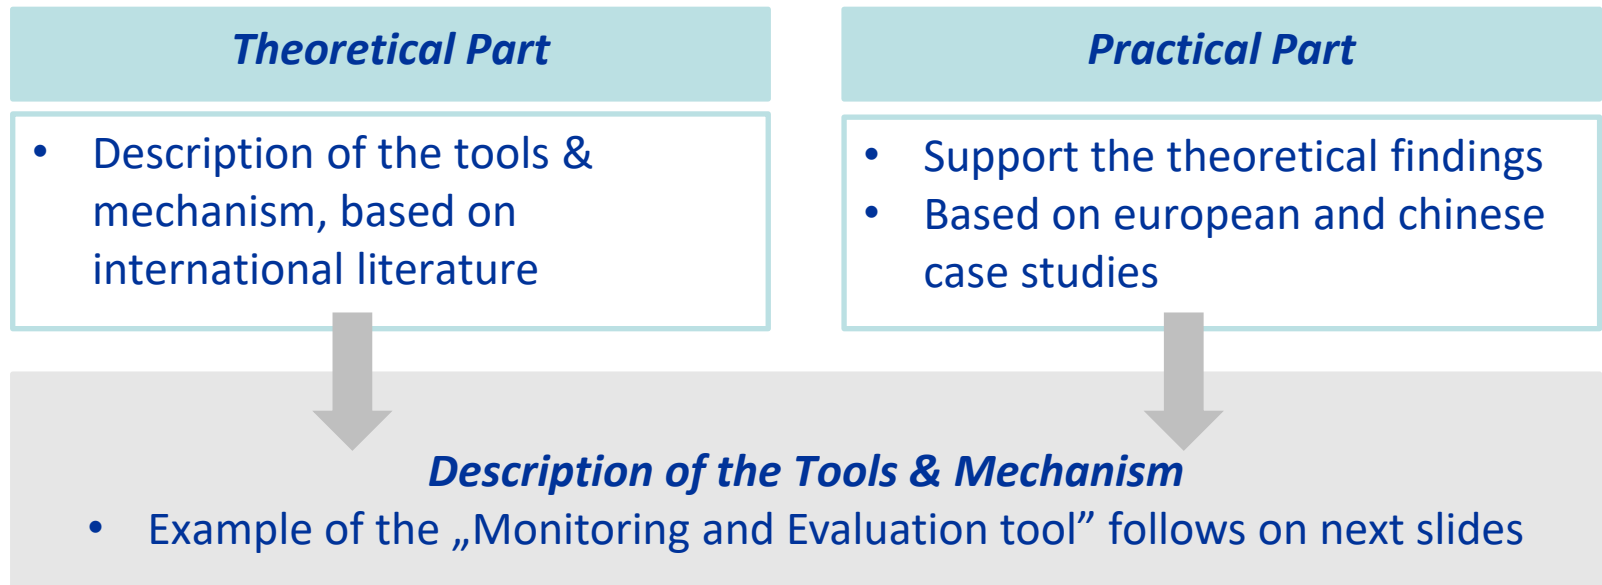

Covered tools & mechanism for bridging the planning-implementation gap

- Aligned funding structures and financing mechanisms
- Multi-actor and community based governance
- Citizen participation and actor involvement
- Living lab approach
- Capacity building
- Agile project management
- Monitoring & evaluation
- Awareness building
- Setting up replication mechanisms
- Digital planning tools

Structure of the tools & mechanism

Each of the 10 tools & mechanism consists of 2 parts:

Theoretical Part

Extract of the “Monitoring and Evaluation tool”

- Description of the tool**

Target: generate a similar understanding for the tool

Aspects	Evaluation	Monitoring
Purpose	Accountability, information, improvement of the design and implementation of the plan	To ensure that what is planned and regulated is actually enforced
When it is performed	Before, during, and after implementation of the plan	During implementation of the plan
Who performs it	External or internal evaluators	Team in charge of the plan
Content of the process	Assess relevance, usefulness, effectiveness and efficiency	Measure the performance and results
Aim of the process	Assess the adequacy of the plan	Correct deviations
Notion of public action	Allows questioning the plan	Does not question the plan

Source: Segura; Pedregal:2017: 3 based on Benabent 2014:130

- Recommendations**

clear responsibilities who is responsible for monitoring necessary

People already involved before the overall goals and targets are formulated

shift to performance monitoring

Practical Part of the “Monitoring and Evaluation Tool”

- **Short description of the Project (context & special features)**

- The Stockholm Royal Seaport development is Sweden's largest urban development area (brownfield development → 12 000 new homes & 35 000 workplace)
- Land is owned by the City of Stockholm, for developing partly sold and partly leased → enables the city to pursue an **effective monitoring and evaluation strategy** as the city is able to set the requirements for developers through **civil contract**.
- Concrete targets of monitoring and evaluation are elaborated and translated into development requirements in **thematic working groups**
- regular monitoring and evaluation is structured through **interactive working groups**

- **Picture of the project area**

TRANS-URBAN-EU-CHINA

Transition towards urban sustainability through socially integrative cities in the EU and in China

Next steps Online Workshop for validation of tools and mechanisms

Date:

Wednesday 26. August 2020 / 09:00h – 11:00h CET / 15:00h – 17:00 China Standart Time (CST) → via Zoom
(organized from Wang Yu)

Program:

- Welcome and opening remarks by Prof. Cai
- Presentation about practical tools and mechanism for the development of sustainable cities, integrative planning and implementation by Hans-Martin
- Panel discussion (feedback, validation, ideas, ...)
- Questions and free discussion
- Conclusion remarks Prof. Bernhard Müller

Participants:

- Professor Dr. Jianming Cai invites experts and stakeholders
- **All interested project partners and stakeholders are cordially invited to join the workshop**
